

1, Types of mediums ?

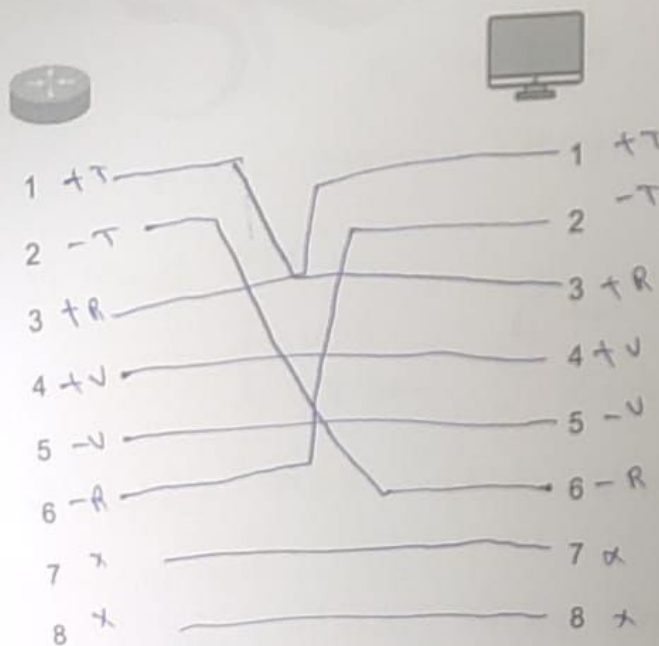

There is three types of medium.

1. Radio frequency - wireless
2. Electrical signal - copper wire
3. Light signal - Fiber.

2, Write down switch 8-pins ?

3, Connect utp cable between two devices

Cross cable

4. Explain AUTO MDIX ?

Auto MDIX stands for Automatic medium-Dependent Interface, that Automatically ~~connects~~ and Adjust Ethernet port connections.

5. Explain POE injector ?

A PoE injector device adds Electrical power to a network devices and allowing network to send and receiving data power over a single cable.

6. Explain POE switch ?

A PoE switch in a network switch that deliver data & Electrical power over a single Ethernet cable to connected device.

7. Explain types of nic & function ?

2 Types of NIC ←

NIC - Network Interface Card.

1) wired NIC

├ UTP - (Lan cable)
└ Fiber - (Fiber optic cable)

2) wireless NIC'S - (Radio frequency)

Function of nic:

Its convert binary signal to electrical & electrical signal to binary.
